Experienced Hydraulic/Civil Engineer (m/f/d)

Start your future at CDM Smith!

CDM Smith provides solutions in water, environment, transportation, energy and facilities to public and private clients worldwide. Our European business has over 700 staff and is a market leader in delivering river engineering, flood management and engineering projects.

CDM Smith is seeking to recruit an experienced hydraulic/civil engineer in Dublin to support a range of different types of projects including fish passage improvement, river restoration, flood management, drainage design and hydraulic modelling. We are looking for candidates with practical experience and strong technical skills.

Requirements

- A degree to preferably MSc level in Civil Engineering or related.
- A minimum of 10 years' experience in hydraulic engineering or related projects.
- Experience in the management of client relationships.
- Demonstrated strong project management skills.
- Experience of all stages of project delivery from feasibility through to construction.
- Design experience on hydraulic engineering projects.
- Familiarity with the procurement process and different contract types used in the sector.
- Knowledge of the design and implementation of fish passage improvement and river restoration projects. (preferred)

What we offer

- Competitive salary;
- Flexible working options; and
- Excellent benefits

Contact

Applications (a CV and cover email) from interested candidates should be sent to dublin@cdmsmith.com before 1st October 2021 and using the reference number **CDM/DUB/21/03**.
